## OUR VALUES

Our Company's philosophy has always privileged quality to quantity in production; the attention to Client's wishes, the quality of the design, of the final product and of supplied services are our best advertising media.

Company's tradition and our Clients requests were the reasons why, besides technological innovation of every component, great attention has always been paid to materials, construction details and wide range of accessories that enable to customize every single project to specific functional requirements, ensuring high technical performance and comfort in use.

At the basis of every project lays the importance paid to ergonomic features because, beyond shape and material, every kitchen is first of all a machine designed to preserve, produce and supply food and must ensure maximum comfort condition to the end user.

Designing a kitchen means to pursue and to find the solution that suits the Client's habits at the best, develop a space that enhances conviviality and ensures easy culinary performance and use.

Our kitchens are built to last, in fact for 60 years we have been offering a product always up-to-date, both modern and classical at the same time, that has always satisfied the requests from every kind of Client, and always will.

MOOD

.01

Mood re-interprets the concept of kitchen in its overall context: it becomes a perfect system where the working space melts with the living area, obtaining thus an open space that is perfect to bring people together.

Doors 30 mm thick. in Medium Density (MDF)  
veneered in brushed larch-wood, with horizontal grain,  
matt lacquer finish.  
Internal structure white faced panels 18 mm thick.  
Class E1.

Inside of columns in faced panels dove-grey colour,  
textile-like linen finish.  
Drawers equipped with controlled closure device.

Groove for opening of tall units included into frame  
width.

Table with metal base antique iron finish and top in solid sycamore wood.

Worktop in white quartz 30 mm thickness, warm led light.

Built-in handle for base units, veneer plinth h. 50 mm.

Chair in white leather.

# GAMMA GLOSS .02

Gamma Gloss, sophisticated and up-to-date brings value to your home. Here elegance matches with functionality creating a kitchen that takes account of one's needs.
